Alternative Cladding

Tanalised 16mm Tongue and Groove

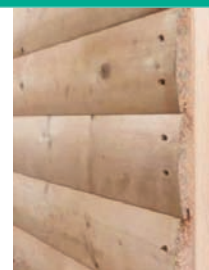

Tanalised timber is available in most of our range as and where priced in the brochure. We tanalise the cladding (4 sides) and floor rail. We use standard dip treated (untanalised) 12mm tongue and groove in floor and roof to avoid unnecessary extra expense. All tanalised sheds are a shade of green and made from 16mm tongue and groove shiplap.

Tanalised sheds are ideal for those who have restricted access or are unable to treat the shed regularly, as these sheds last many years without the worry of treatment.

Log Lap (19mm Standard dip)

Our 19mm log lap tongue and groove cladding will enhance any summerhouse or home office.

Budget Sheds

Caravan Corner Apex or Pent

Front, roof and floor - full tongue and groove cladding. Rest of store is robust close board panelling. Galvanised nails. Full height sheds.

Raft System

Raft System for Garden Buildings

Our raft system with its simple common sense approach offers you an excellent alternative to the more traditional concrete or slab base. This method allows more air flow and much less water is in contact with the floor bearers, keeping the building dry, which makes your building last longer.

The raft system avoids the need to dig a foundation or wait for concrete to set, enabling us to lay the raft and erect your building on the same day.

Not only does this simple system save you money and is kinder to the environment, it is easy to reposition your building, should you need to do so, saving you breaking up the old concrete and disposing of it.

To install a raft all we ask of you is to ensure the area is levelled prior to our arrival.

Example below:

10x8 Raft on slabs laid on soil

10x8 floor on raft

10x8 Apex on a raft system

Row of 8x6 apex sheds on rafts

Slab laid on grass ready for a raft

6x4 Apex shed on a raft laid on grass

- Left hinged doors £5
- Dismantling & Removal service available - shed must be empty and free of all utilities, i.e. all electrics disconnected etc.

GENERAL INFORMATION

All our sheds are pre-treated with preservative. We recommend that you treat your shed after it has been erected and every year thereafter.

The base should ideally be made of concrete, slabs or our raft system method. Most importantly **IT MUST BE LEVEL.** Ideally the base should be the same size as the floor size of the building.

It is important to have guttering so as to prevent splash back and any further water penetration.

Providing that our recommendations are followed, we offer a one year guarantee on all our buildings. This guarantee excludes storm/wind damage.

TELESHEDS PROMISE YOU A COMPLETE SHED FOR THE PRICE YOU SEE

Access: It is important to check for access to ensure that the panels can be taken with ease to the point where the building is to be erected. Due to health and safety, our erectors will not carry panels over fences or garages etc.

Whilst every care is taken in purchasing the correct grade of timber for shed construction, timber, being a natural product does shrink and expand according to weather and temperature. Knot holes and cracks can occur during this process. This is unfortunately beyond our control.

The roofing felt we use is new and specially formulated for use on garden sheds. Occasionally the felt can wrinkle; this is due to temperature changes and not to any fault in the product.

HOW TO ORDER YOUR TeleShed

1. FIND OUT WHICH SHED YOU LIKE

Make a note of the type and size, position of doors and windows (if req'd) and any optional extras (left)

2. PHONE US ON OUR NATIONAL HOTLINE

01234 825106

Place your order with experienced TeleSheds staff who will make sure you choose the right shed. When ordering we will give you a delivery date and then, on the day of delivery we will confirm by phone time of delivery.

3. PAYMENT

Can be made in cash at the time of delivery or other payment methods, prior to delivery.

Please make all cheques payable to TeleSheds.

IT'S SO EASY

There's no pressure from our staff, just helpful advice.
