How Safe is My Home?

## HOW SAFE IS YOUR HOME? ADDISON OUSEBANK REPORTS ON A POTENTIAL SECURITY RISK...

If you have got doors with a multi-point locking system, your door is locked, but the system is only as efficient as your lock cylinder. Lock cylinders are under threat by thieves with new techniques known as 'Lock Bumping' and 'Lock Snapping'.

**Lock bumping** can be used on many locks fitted in the last 20 years. The method involves the use of special keys knocked into the lock cylinder it leaves no sign of forced entry (*which could have implications for your contents insurance cover*).

**Lock snapping** is a means of attacking the lock cylinder itself to force entry.

**Addison Ousebank** have always fitted the latest high security locking systems; anti drill cylinders and steel reinforced handle cover plates. We were so concerned when we learnt of this problem, we have scanned the markets for a lock cylinder which is **anti-bump and snap proof**, we are pleased to say we have found a suitable product as pictured. Whilst **we do not want to scare people** we feel this important message should be told.

Picture above shows NEW Lock from the CISA range. Anti-bump, Anti Pick, Anti-drill and Snap Proof lock with code card.

We are able to retro-fit the new lock cylinder into most PVCu doors for only £125.00 for the first lock and subsequent locks at £60.00 each. Existing Addison Ousebank customers will be contacted ASAP.

So, don't be a victim, **ring us today on 01234 825106** or complete the form below. More details can be found on our website:
